## ANALYTIC SUBJECT INDEX

*1-cyanoadamantane*
- Low frequency vibrational modes in the glassy state of 1-cyanoadamantane: the density of states from incoherent neutron scattering - Bée et al. 160 (1989) 165

*Alkaline-transition metal compounds*
- Magnetic phase transition in $CsVF_4$ - Ikeda et al. 160 (1990) 287

*$\alpha$-$In_2S_{3-x}Se_x$*
- Near band-edge optical investigation of $\alpha$-$In_2Se_3$ and — mixed crystals - Kambas 160 (1989) 103

*$\alpha$-$In_2Se_3$*
- Near band-edge optical investigation of — and $\alpha$-$In_2S_{3-x}Se_x$ mixed crystals - Kambas 160 (1989) 103

*Ammonium compounds*
- Cross relaxation of the proton magnetization in — - Punkkinen et al. 160 (1990) 338

*Amorphous materials*
- On some thermodynamic properties of — - Gladkov 160 (1989) 211

*Anderson model, thermodynamical properties of*
- Thermodynamical properties of the Anderson model in the atomic limit - Noce and Romano 160 (1990) 304

*Anomalous behaviour of* (see *$NdMn_2$*) 160 (1990) 388

*Areal superfluid density*
- Improved measurements of the — of $^4$He films - Brocken et al. 160 (1989) 91

*$As_2Se_3$*
- Thin films of — synthesized by spin-coating - Eze 160 (1990) 365

*Atomic limit* (see *Localized electrons*) 160 (1990) 304

*Barrier model, semi-infinite periodic rectangular*
- A semi-infinite periodic rectangular barrier model to study surface states - Narayan and Karakashian 160 (1989) 97

*Binary phase systems*
- Finite temperature conductivity in site percolation problems - Ahmed et al. 160 (1989) 161

*$CdK_2(SO_4)_2 \cdot 6H_2O_3$, $VO^{2+}$ doped*
- EPR of $VO^{2+}$-doped $CdK_2(SO_4)_2 \cdot 6H_2O$: forbidden hyperfine transitions and bonding coefficients - Misra and Wang 160 (1989) 129

*CdS, A-exciton spectrum*
- An alternate treatment of magnetic and electric field effects on the A-exciton spectrum in cadmium sulfide - Dai et al. 160 (1990) 317

*Chain-like structures*
– On the non-linear properties of $TlInX_2$ (X = S, Se, Te) ternary compounds - Hanias et al. 160 (1989) 154
*Chalcogenide films*
– Thin films of $As_2Se_3$ synthesized by spin-coating - Eze 160 (1990) 365
*$C_{10}H_{15}CN$*
– Low frequency vibrational modes in the glassy state of 1-cyanoadamantane: the density of states from incoherent neutron scattering - Bée et al. 160 (1989) 165
*Chemical shift* (see *Ternary compounds*) 160 (1989) 125
*Computer simulations* (see *Site percolation problems*) 160 (1989) 161
*Cross relaxation, proton spin*
– Cross relaxation of the proton magnetization in ammonium compounds - Punkkinen et al. 160 (1990) 338
*$CrSi_2$-films*
– Dependence of $1/f$ noise in $CrSi_2$ films on the temperature coefficient of the resistance - Belan et al. 160 (1989) 183
*$CsVF_4$*
– Magnetic properties of layer compound — - Hidaka et al. 160 (1990) 271
– Magnetic phase transition in — - Ikeda et al. 160 (1990) 287
*CuSe, liquid*
– The structure of liquid copper selenide - Howe 160 (1989) 170

*Density matrix*
– A — approach to the Goldanskii–Karyagin effect - Ruebenbauer et al. 160 (1990) 393
*Density matrix, two-line*
– An electret model based on the two-level system theory - Gladkov 160 (1990) 369
*Density of states, computer simulation*
– Density of states for a disordered system of interacting dipoles - Cuevas et al. 160 (1990) 293
*Disordered system of dipoles*
– Density of states for a disordered system of interacting dipoles - Cuevas et al. 160 (1990) 293
*Dispersion relation*
– Hamiltonian density and — for hybrid Coulomb fields in solids - Chamberlain and Babiker 160 (1990) 271

*Electret model*
– An — based on the two-level system theory - Gladkov 160 (1990) 369
*Electrical resistivity of thorium*
– — up to 10 GPa and 1300 K - Sahu et al. 160 (1989) 177
*Electron–phonon interband scattering*
– Electrical resistivity of thorium up to 10 GPa and 1300 K - Sahu et al. 160 (1989) 177
*EPR*
– — of $VO^{2+}$-doped $CdK_2(SO_4)_2 \cdot 6H_2O$: forbidden hyperfine transitions and bonding coefficients - Misra and Wang 160 (1989) 129
*Equation of state*
– Behaviour of the — of some liquid *n*-alkanes at high pressures - Solana et al. 160 (1990) 352
*Exciton spectrum*
– An alternate treatment of magnetic and electric field effects on the A- — in cadmium sulfide - Dai et al. 160 (1990) 317

*f–d hybridazation*
– A high pressure low temperature study on rare earth compounds: semiconductor to metal transition - Neuenschwander and Wachter 160 (1990) 231
*1/f noise*
– Dependence of — in $CrSi_2$ films on the temperature coefficient of the resistance - Belan et al. 160 (1989) 183
*Field effects (magnetic and electric)*
– An alternate treatment of magnetic and electric field effects on the A-exciton spectrum in cadmium sulfide - Dai et al. 160 (1990) 317
*Flux transitions*
– Thermally activated — in a metabistable system consisting of a superconducting ring closed with a superconducting point contact - de Wolff et al. 160 (1989) 118

*Goldenskii–Karyagin effect*
– A density matrix approach to the Goldanskii–Karyagin effect - Ruebenbauer et al. 160 (1990) 393
*Granular systems*
– Non-Ohmic effects in — - Mostefa et al. 160 (1989) 186

*Hard-spheres system, high density*
– Behaviour of the equation of state of some liquid *n*-alkanes at high pressures - Solana et al. 160 (1990) 352
*$^4$He films*
– Improved measurements of the areal superfluid density of — - Brocken et al. 160 (1989) 91
*Heavy fermion properties*
– Evidences of dense Kondo behaviour in the U–Au sytem: electrical and magnetic investigations in $U_{14}Au_{51}$ and $UAu_2$ - Canepa et al. 160 (1990) 297
*Heisenberg antiferromagnet*
– Application of the thermal Boson expansion to the — $MnF_2$ - Brajczewska et al. 160 (1990) 357
*Hooge's parameter*
– Dependence of $1/f$ noise in $CrSi_2$ films on the temperature coefficient of the resistance - Belan et al. 160 (1989) 183
*Hybrid Coulomb fields*
– Hamiltonian density and dispersion relation for — in solids - Chamberlain and Babiker 160 (1990) 271
*Hyperfine transitions, forbidden*
– EPR of $VO^{2+}$-doped $CdK_2(SO_4)_2 \cdot 6H_2O$: forbidden hyperfine transitions and bonding coefficients - Misra and Wang 160 (1989) 129

*Incoherent neutron scattering*
– Low frequency vibrational modes in the glassy state of 1-cyanoadamantane: the density of states from — - Bée et al. 160 (1989) 165
*Inelastic neutron scattering*
– — with polarization analysis - Pynn et al. 160 (1989) 204
*Inert gases*
– Thermodynamic properties of metastable liquefied inert gases. Part 2. $P$, $\rho$, $T$-properties of superheated krypton - Baidakov and Gurina 160 (1989) 221

*Inoue–Shimizu model*
– The magnetic phase transitions in (Tb, Ho)$Co_2$ and (Tb, Y)$Co_2$ compounds - Duc et al. 160 (1989) 199
*Intermediate valence states*
– Thermodynamical properties of the Anderson model in the atomic limit - Noce and Romano 160 (1990) 304
*Ising dipoles, interacting*
– Density of states for a disordered system of interacting dipoles - Cuevas et al. 160 (1990) 293
*Itinerant systems, weakly*
– Magnetic fluctuations in weakly itinerant systems; a theory of the specific heat and the entropy - Mohn and Hilscher 160 (1989) 113

*Kondo behaviour*
– Evidences of dense — in the U–Au sytem: electrical and magnetic investigations in $U_{14}Au_{51}$ and $UAu_2$ - Canepa et al. 160 (1990) 297
*Kr*
– Thermodynamic properties of metastable liquefied inert gases. Part 2. $P$, $\rho$, $T$-properties of superheated krypton - Baidakov and Gurina 160 (1989) 221

*Landau coefficient / Magnetic fluctuations*
– Magnetic fluctuations in weakly itinerant systems; a theory of the specific heat and the entropy - Mohn and Hilscher 160 (1989) 113
*Lattice dynamics*
– Phonon dispersion of d and f shell metals: a dynamical treatment - Singh 160 (1990) 313
– A density matrix approach to the Goldanskii–Karyagin effect - Ruebenbauer et al. 160 (1990) 393
*Librational tunneling*
– Cross relaxation of the proton magnetization in ammonium compounds - Punkkinen et al. 160 (1990) 338
*Liquid copper selenide*
– The structure of — - Howe 160 (1989) 170
*Localized electrons*
– Thermodynamical properties of the Anderson model in the atomic limit - Noce and Romano 160 (1990) 304

*Macroscopic quantum tunnelling*
– Thermal activation in the quantum regime and macroscopic tunnelling in the thermal regime in a metabistable system consisting of a superconducting ring interrupted by a weak junction. Part III: macroscopic quantum tunnelling in the thermal regime - Bol and de Bruyn Ouboter 160 (1989) 56
*Magnetic phase transition*
– — in $CsVF_4$ - Ikeda et al. 160 (1990) 287
*Magnetic phase transitions*
– The — in (Tb, Ho)$Co_2$ and (Tb, Y)$Co_2$ compounds - Duc et al. 160 (1989) 199
*Magnetic properties of $CsVF_4$*
– Magnetic properties of layer compound $CsVF_4$ - Hidaka et al. 160 (1990) 271
*Magnetic properties of thulium intermetallic compounds*
– Magnetic properties of $TmAl_3$ and $TmGa_3$ - Deutz et al. 160 (1989) 83

*Metabistable system*
– Thermal activation in the quantum regime and macroscopic tunnelling in the thermal regime in a — consisting of a superconducting ring interrupted by a weak junction. Part III: macroscopic quantum tunnelling in the thermal regime - Bol and de Bruyn Ouboter 160 (1989) 56
*$MnFe_2$*
– Application of the thermal Boson expansion to the Heisenberg antiferromagnet $MnF_2$ - Brajczewska et al. 160 (1990) 357
*Mössbauer absorption*
– A density matrix approach to the Goldanskii–Karyagin effect - Ruebenbauer et al. 160 (1990) 393
*Multiband model*
– Spin waves in nickel thin films - Świrkowicz 160 (1990) 329
*Multicomponent fields*
– Hamiltonian density and dispersion relation for hybrid Coulomb fields in solids - Chamberlain and Babiker 160 (1990) 271

*n-Alkanes, liquid*
– Behaviour of the equation of state of some liquid *n*-alkanes at high pressures - Solana et al. 160 (1990) 352
*$NdMn_2$*
– Magnetic, thermal and transport properties of — - Kim-Ngan et al. 160 (1990) 388
*Nearly-ideal Fermi gas*
– Thermodynamics of liquid $^3$He–$^4$He mixtures - de Waele and Kuerten 160 (1989) 143
*Neutron diffraction*
– The structure of liquid copper selenide - Howe 160 (1989) 170
– Magnetic properties of layer compound $CsVF_4$ - Hidaka et al. 160 (1990) 271
*Ni, thin films*
– Spin waves in nickel thin films - Świrkowicz 160 (1990) 329
*NiTi–Al alloy*
– Detection of anomalous properties in a premartensitic phenomenon of NiTi enhanced by addition of aluminum - Matsumoto 160 (1989) 138
*NMR*
– Vortices in rotating superfluid $^3$He - Hakonen et al. 160 (1989) 1
*Non-linear properties*
– On the — of $TlInX_2$ (X = S, Se, Te) ternary compounds - Hanias et al. 160 (1989) 154
*Non-Ohmic effects* (see *Granular systems*) 160 (1989) 186

*Optical absorption investigation, near band-edge*
– Near band-edge optical investigation of $\alpha$-$In_2Se_3$ and $\alpha$-$In_2S_{3-x}Se_x$ mixed crystals - Kambas 160 (1989) 103

*Percolation model*
– Non-Ohmic effects in granular systems - Mostefa et al. 160 (1989) 186
*Periodic Anderson model* (see *Intermediate valence states*) 160 (1990) 304
*Phase transition, magnetic*
– Magnetic phase transition in $CsVF_4$ - Ikeda et al. 160 (1990) 287
*Phonon dispersion*
– — of d and f shell metals: a dynamical treatment - Singh 160 (1990) 313

*Phonon–plasmon modes*
– Hamiltonian density and dispersion relation for hybrid Coulomb fields in solids - Chamberlain and Babiker 160 (1990) 271
*Physical properties (magnetic, transport) of* (see $NdMn_2$) 160 (1990) 388
*Plasmon–phonon coupling*
– Filtering properties of polar semiconductors - Srivastava et al. 160 (1990) 347
*Polar semiconductors*
– Filtering properties of — - Srivastava et al. 160 (1990) 347
*Polarization analysis*
– Inelastic neutron scattering with — - Pynn et al. 160 (1989) 204
*Premartensic phenomenon*
– Detection of anomalous properties in a premartensitic phenomenon of NiTi enhanced by addition of aluminum - Matsumoto 160 (1989) 138
*Pressure dependence of resistivity*
– Electrical resistivity of thorium up to 10 GPa and 1300 K - Sahu et al. 160 (1989) 177

*Quantum well structures*
– A semi-infinite periodic rectangular barrier model to study surface states - Narayan and Karakashian 160 (1989) 97

*Rare earth compounds*
– A high pressure low temperature study on rare earth compounds: semiconductor to metal transition - Neuenschwander and Wachter 160 (1990) 231
*Reverse Monte Carlo modelling*
– The structure of liquid copper selenide - Howe 160 (1989) 170
*Rotating superfluid $^3He$*
– Vortices in — - Hakonen et al. 160 (1989) 1

*Sabisky–Anderson potential*
– Improved measurements of the areal superfluid density of $^4He$ films - Brocken et al. 160 (1989) 91
*Selenides and tellurides* (see *Non-linear properties*) 160 (1989) 154
*Semiconductor–metal transition*
– A high pressure low temperature study on rare earth compounds: semiconductor to metal transition - Neuenschwander and Wachter 160 (1990) 231
*Semiconductors, polar*
– Filtering properties of polar semiconductors - Srivastava et al. 160 (1990) 347
*Shell metals, d and f* (see *Transition and rare earth metals*) 160 (1990) 313
*Site percolation problems*
– Finite temperature conductivity in — - Ahmed et al. 160 (1989) 161
*Spin-coating*
– Thin films of $As_2Se_3$ synthesized by — - Eze 160 (1990) 365
*Spin fluctuations*
– Magnetic fluctuations in weakly itinerant systems; a theory of the specific heat and the entropy - Mohn and Hilscher 160 (1989) 113
– Inelastic neutron scattering with polarization analysis - Pynn et al. 160 (1989) 204
*Spin waves*
– — in nickel thin films - Świrkowicz 160 (1990) 329

*SQUID*
– Thermal activation in the quantum regime and macroscopic tunnelling in the thermal regime in a metabistable system consisting of a superconducting ring interrupted by a weak junction. Part III: macroscopic quantum tunnelling in the thermal regime - Bol and de Bruyn Ouboter 160 (1989) 56
*SQUID ring system*
– Thermally activated flux transitions in a metabistable system consisting of a superconducting ring closed with a superconducting point contact - de Wolff et al. 160 (1989) 118
*Superheated liquefied inert gases*
– Thermodynamic properties of metastable liquefied inert gases. Part 2. $P$, $\rho$, $T$-properties of superheated krypton - Baidakov and Gurina 160 (1989) 221
*Surface states*
– A semi-infinite periodic rectangular barrier model to study — - Narayan and Karakashian 160 (1989) 97

*(Tb,Ho)$Co_2$ compounds*
– The magnetic phase transitions in (Tb, Ho)$Co_2$ and (Tb, Y)$Co_2$ compounds - Duc et al. 160 (1989) 199
*(Tb,Y)$Co_2$ compounds*
– The magnetic phase transitions in (Tb, Ho)$Co_2$ and (Tb, Y)$Co_2$ compounds - Duc et al. 160 (1989) 199
*Ternary compounds*
– Effect of chemical combination of X-ray absorption edges of — - Husain et al. 160 (1989) 125
*Th*
– Electrical resistivity of thorium up to 10 GPa and 1300 K - Sahu et al. 160 (1989) 177
*Thermal activation*
– Thermally activated flux transitions in a metabistable system consisting of a superconducting ring closed with a superconducting point contact - de Wolff et al. 160 (1989) 118
*Thermal boson expansion*
– Application of the thermal Boson expansion to the Heisenberg antiferromagnet $MnF_2$ - Brajczewska et al. 160 (1990) 357
*Thermodynamic properties*
– On some — of amorphous materials - Gladkov 160 (1989) 211
*Thermodynamic properties* (see *Kr*) 160 (1989) 221
*Thermodynamics of liquid helium mixtures*
– Thermodynamics of liquid $^3$He–$^4$He mixtures - de Waele and Kuerten 160 (1989) 143
*Thin films, of* (see *$As_2Se_3$*) 160 (1990) 365
*Third sound Helmholtz oscillations*
– Improved measurements of the areal superfluid density of $^4$He films - Brocken et al. 160 (1989) 91

*$^3$He, superfluid*
– Vortices in rotating superfluid $^3$He - Hakonen et al. 160 (1989) 1
*$^3$He–$^4$He mixtures*
– Thermodynamics of liquid — - de Waele and Kuerten 160 (1989) 143

*Ti–Cr alloys*
– Possibility of spontaneous vitrification in — - Gallego et al. 160 (1989) 108
*$TlInX_2$ (X = S,Se,Te)*
– On the non-linear properties of $TlInX_2$ (X = S, Se, Te) ternary compounds - Hanias et al. 160 (1989) 154
*$TmAl_3$*
– Magnetic properties of — and $TmGa_3$ - Deutz et al. 160 (1989) 83
*$TmGa_3$*
– Magnetic properties of $TmAl_3$ and — - Deutz et al. 160 (1989) 83
*Transition and rare earth metals*
– Phonon dispersion of d and f shell metals: a dynamical treatment - Singh 160 (1990) 313
*Two-level systems*
– An electret model based on the two-level system theory - Gladkov 160 (1990) 369

*$UAu_2$*
– Evidences of dense Kondo behaviour in the U–Au sytem: electrical and magnetic investigations in $U_{14}Au_{51}$ and — - Canepa et al. 160 (1990) 297
*$U_{14}Au_{51}$*
– Evidences of dense Kondo behaviour in the U–Au sytem: electrical and magnetic investigations in — and $UAu_2$ - Canepa et al. 160 (1990) 297
*Ultrasonic velocity and attenuation*
– Detection of anomalous properties in a premartensitic phenomenon of NiTi enhanced by addition of aluminum - Matsumoto 160 (1989) 138

*Valence instability*
– A high pressure low temperature study on rare earth compounds: semiconductor to metal transition - Neuenschwander and Wachter 160 (1990) 231
*Van der Waals potential*
– Improved measurements of the areal superfluid density of $^4$He films - Brocken et al. 160 (1989) 91
*Vanadyl doping*
– EPR of $VO^{2+}$-doped $CdK_2(SO_4)_2 \cdot 6H_2O$: forbidden hyperfine transitions and bonding coefficients - Misra and Wang 160 (1989) 129
*Vibrational modes* (see *1-cyanoadamantane*) 160 (1989) 165
*Vitrification, spontaneous*
– Possibility of spontaneous vitrification in Ti–Cr alloys - Gallego et al. 160 (1989) 108
*Vogel–Fulcher law*
– On some thermodynamic properties of amorphous materials - Gladkov 160 (1989) 211
*Vortices*
– — in rotating superfluid $^3$He - Hakonen et al. 160 (1989) 1

*Wurtzite materials*
– An alternate treatment of magnetic and electric field effects on the A-exciton spectrum in cadmium sulfide - Dai et al. 160 (1990) 317

*X-ray absorption edges*
– Effect of chemical combination of — of ternary compounds - Husain et al. 160 (1989) 125
